

Specialised Camera Solutions

Airport vision solutions

At airports, safety is of paramount importance. When loading and unloading aeroplanes there is a great deal of activity around the aeroplane; all kinds of vehicles go to and from the aircraft, but there are also a lot of people walking in and around the aircraft. Orlaco's cameras offer a safe, efficient and comfortable solution.

Vision is our Mission

www.oralco.com

The cameras and monitors from Orlaco are used at airports across the globe. Orlaco offers camera systems specifically for airport vehicles. These include aircraft tugs, de-icers, crash tenders, toilet carts, tank dispensers, drinking-water trucks, kerosene pump and tank trucks and baggage handling. Orlaco's products comply with stringent requirements. One such requirement is the EMC standard, which ensures that the systems do not interfere with the communication equipment in use at airports. In addition, there is an entire range of ADR-certified products. This means that numerous configurations are available for transporting hazardous materials.

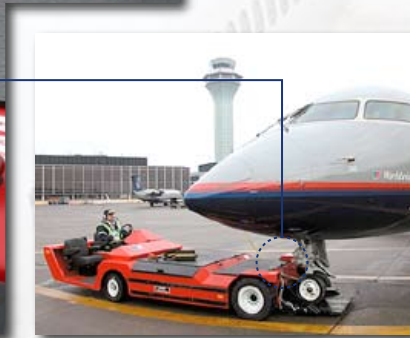

The technology behind Orlaco:

- The front camera has been approved according to the European mirror directives (certificate e4*2003/97*2005/27*0001*03).
- ADR certificate: KEMA 03ATEX1445 X and IECEx KEM 09.0002X.
- EMC certificate camera, e4*72/245*2006/28*0489*01 and monitor e4*72/245*2006/28*1005*01.

The organization behind the vision solutions

Orlaco offers its customers a worldwide distribution and service network and produces her vision solutions under the strictest quality standards. Orlaco is also ISO 9001-2000 and ISO 14001 certified. Thanks to a successful partnership with various leading commercial vehicle importers and manufacturers, Orlaco is able to guarantee all her customers excellent service and on time delivery of all its products.
